UNITED NATIONS
SUSTAINABLE
DEVELOPMENT GOALS

1 NO POVERTY

- **No poverty around the world**. Poverty is considered as people living on less than $1.25 daily.
- **Reduce overall poverty by 50%** for men, women, and children.
- **Set up social protection** and roll it out to as many poor or vulnerable people as possible.
- **Ensure that everyone, including** the poor and vulnerable, has equal economic rights regarding essential financial & residential services.
- **Help reduce exposure caused** by environmental or economic shock for poor or vulnerable people.
- **Set up infrastructure & funding** for the poor and vulnerable in developing countries to help end poverty globally.
- **S**et up policies and frameworks a**t every level to help drive investment into projects that help people experiencing

2 ZERO HUNGER

- **End world hunger** by enabling access to nutritious and sufficient food year-round, focusing on the poorest and vulnerable.
- **End all forms of malnutrition,** especially in children under five, where stunting and wasting are problematic.
- **Double agricultural productivity** in poor areas. Particularly for women, indigenous peoples,
- **Maintain a diverse mix of indigenous** seeds and domesticated animals, sharing any benefit from these genetic resources and traditional knowledge with the communities.
- **Increase investment in rural** infrastructure, agricultural research and create a fair environment for trade.

3 GOOD HEALTH AND WELL-BEING

- **Reduce the death rate at childbirth** to less than 70 deaths in 100,000 live births.
- **To reduce the preventable deaths** of newborns to 12 per 1,000 live births and children under five to 25 per 1,000.
- **End epidemics worldwide**, including AIDS, tuberculosis, malaria and neglected tropical diseases.
- **Help reduce and prevent the afflictions** of substance abuse from narcotics and alcohol.
- **Halve the number of people** killed in road traffic accidents.
- **Ensure everyone has access** to sexual & reproductive health care services and education.
- **Develop Universal health** care to allow access to quality and essential health services without financial risk.
- **Reduce the number of deaths** caused by pollution and contamination by hazardous chemicals.
- **Strengthen the WHO's framework** on Tobacco control.
- **Improve legislation to allow developing** countries to use and develop medical patents.
- **Help develop the health care** systems in developing countries, including the training and recruitment of staff.

4 QUALITY EDUCATION

- **Ensure that all children**, boys and girls receive quality education up to secondary school.
- **Ensure all children have** quality preschool education and are ready for primary school.
- **Create equal access for** men and women to affordable education after secondary education, including university.
- **Develop technical skills** of young adults and adults in vocational areas that lead to
- **Ensure equal access to** education for all genders and vulnerable people.
- **Educate men and women** so they are capable of basic literacy and numeracy.
- **Make sure sustainability** is taught as part of the education people receive.
- **Develop buildings and facilities** used for education so that they are inclusive & safe environments.
- **Offer more Scholarships** to overseas students in developing countries.
- **Increase the amount of trained** educational staff through teacher training programmes in developing countriesworldwide.

---

5 GENDER EQUALITY

- **End discrimination towards** women and girls everywhere
- **Eliminate all forms of** violence and exploitation of girls and women globally.
- **Remove all forms of female** genital mutilation & child marriages worldwide.
- **Set up infrastructure that** recognises & values domestic work and care in the household as nationally appropriate.
- **Guarantee reproductive rights and** sexual health are accessible across the board.
- **Reform policies were needed** to allow women equal rights to land ownership, property, inheritance & natural resources.
- **Create access to devices like** computers and phones to empower women.
- **Strengthen and create policies** that empower women and girls at all levels.

---

6 CLEAN WATER AND SANITATION

- **Accomplish access to 100%** safe and affordable drinking water for everyone.
- **Accomplish access to decent** sanitation and hygiene globally with particular attention to women and girls in vulnerable areas.
- **Enhance water quality by** improving sanitation, reducing pollution and having untreated wastewater.
- **Improve water use efficiency** and make sure the withdrawal of freshwater is sustainable to address issues caused by water scarcity.
- **Where possible, integrate** water resources across borders to help manage fresh water and reduce waste.
- **Restore ecosystems that support** freshwater generation and recycling, like mountains, forests, wetlands and rivers.
- **Help developing countries** develop their water efficiency and sanitation programmes.
- **Educate and support local** communities in managing water & sanitation.

---

7 AFFORDABLE AND CLEAN ENERGY

- **Guarantee complete access to** affordable and sustainable energy services.
- **Make sure renewable energy** use is increased internationally.
- **Improve energy efficiency internationally** by twice as much.
- **Improve relations with other countries** to develop and research renewable energy solutions & remove the use of fossil fuels.
- **Help developing countries gain** access to improved energy solutions.

8 DECENT WORK AND ECONOMIC GROWTH

- **Sustain and develop economic** growth to boost productivity by 7% annually in developing countries.
- **Improve economic productivit**y by diversifying, upgrading and innovating.
- **Help micro, small and medium-sized** businesses with policies that promote development & inspire entrepreneurship, including access to financial services.
- **Make the use of resources more** sustainable and remove the links between economic growth and environmental damage.
- **Achieve total employment in good** jobs for all women and men, including young people and the less abled.
- **Reduce youth unemployment or young** people not in training or education.
- **End modern slavery and forced** labour in all its forms.
- **Ensure safety and working standards** are upheld for all, including migrant workers.
- **Promote local cultures & products** through sustainable tourism.
- **Help domestic financial institutions** to improve access to banking services worldwide.
- **Help developing countries benefit** from trade with a support framework.
- **Develop a strategy to help** young people gain employment.

9 INDUSTRY, INNOVATION AND INFRASTRUCTURE

- **Develop infrastructure to develop** economic support that is inclusive, sustainable & resilient.
- I**mprove industry to increase** employment and productivity, especially in developing countries.
- **Help smaller-scale industries** gain access to services that will help them grow, including affordable financial services.
- **Improve research and development** of technology that can improve the industrial sectors, focusing on developing countries.
- **Help build and finance sustainable** infrastructure in developing countries.
- **Help developing countries** develop their own technology research and development programmes.
- **Help the least developed** countries get online with more access to computers and phones.

10 REDUCED INEQUALITIES

- **Help people on lower** incomes improve their finances to a rate higher than the national average.
- **Remove all social barriers** so everyone has equal access to financial services and a voice in politics.
- **Remove any outdated** policies that may discriminate against people.
- **Include developing countries** in global politics, especially in areas that will affect them.
- **Develop safe and responsible** policies to ensure the safe migration of people.
- **Ensure developing countries** have differential treatment following the World Trade Organisation.
- **Help developing countries** with foreign investment to develop in areas where it's needed most.
- **Reduce the amount it costs** for people to migrate safely.
- **Improve water use efficiency** and make sure the withdrawal of freshwater is sustainable to address issues caused by - water scarcity.
- **Where possible, integrate water** resources across borders to help manage fresh water and reduce waste.
- **Restore ecosystems that support** freshwater generation and recycling, like mountains, forests, wetlands and rivers.
- **Help developing countries develop** their water efficiency and sanitation programmes.
- **Educate and support local** communities in managing water & sanitation.

11 SUSTAINABLE CITIES AND COMMUNITIES

- **Accomplish safe and affordable** housing for everyone along with essential services.
- **Develop public transport that** is affordable, accessible and sustainable with particular attention to the vulnerable.
- **Develop urban areas that** are inclusive and sustainable with the option of settling people from other traditions.
- **Allow the safekeeping of** people's cultural & natural heritage.
- **Help people at risk of economic** trouble after natural disasters with a focus on the world's poorest areas.
- **Make sure green spaces are** accessible to all, with a focus on the elderly and vulnerable.
- **Build on economic links** between rural and urban areas.
- **Increase the number of cities**, towns & rural areas working towards a more sustainable future.
- **Help developing countries build** sustainable and robust buildings using local materials.

---

12 RESPONSIBLE CONSUMPTION AND PRODUCTION

- **Create a framework of programmes** for countries on consuming and producing sustainably, with developed countries taking the lead.
- **Ensure that natural resources** are managed and used sustainably.
- **Reduce food water at** consumer, retail & production levels.
- **Ensure hazardous products,** including disposal, are correctly dealt with throughout their life.
- **Reduce waste through** recycling & prevention.
- **Urge industry leaders** to work sustainably.
- **Ensure public and governmental** services use sustainable services & resources.
- **Guarantee that people** are educated in sustainable living.
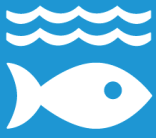

---

13 CLIMATE ACTION

- **Strengthen and improve defences** against issues related to climate change and its effects.
- **Make any changes to do** with climate change into national policies, planning and strategies.
- **Increase education and raise** awareness about climate change and how to avoid it.
- **Fulfil the promise from** developed countries in the UN to organise $100 billion annually to help developing countries deal with climate-related issues.
- **Create processes to generate** what's needed for proactive climate-related planning and management in developing countries.
- **Better regulations and monitoring** of financial markets to help strengthen economies.

---

14 LIFE BELOW WATER

- **Reduce pollution contaminating** the ocean, especially nutrient pollution and sea debris.

- **Build strength and resilience** in marine and coastal environments to avoid further damaging marine life and avoid the risk of adverse effects.

- **Fully understand why** oceans are becoming more acidic and reduce these issues.

- **Implement and enforce** fishing controls to allow fish stocks to return quickly.

- **Create conservation areas** on at least 10% of coastal habitats.

- **Reform fishing regulations that** may encourage overfishing or illegal fishing activities with special consideration given to developing countries.

- **Help developing countries** benefit economically from the sustainable use of their coasts and marine resources.

- **Allow developing countries access** to technology and knowledge that will help improve ocean and aquatic life conditions.

- **Allow small fisheries access to** commercial markets & resources.

15 LIFE ON LAND

- **Guarantee that freshwater** ecosystems are put under conservation, are used sustainably and restored where necessary.

- **Build on the sustainable management** of all forest types worldwide and restore them where necessary.

- **Help restore areas turning** to desert, including areas affected by drought and floods.

- **Guarantee the ecosystems and biodiversity** of mountain environments to aid sustainable development.

- **Act now to stop the extinction** of wildlife and other biodiversity worldwide.

- **Ensure all parties benefit from** using plants, animals and other genetic resources.

- **Act now to stop poaching activities** and the illegal trafficking of wildlife or plants and address tackling the black market.

- **Help prevent invasive alien species** with new measures and reduce the impact caused by current priority species.

- **Ensure that current planning and** development processes integrate with local ecosystems and biodiversity.

- **To secure funding & resources from** all sectors to conserve biodiversity and use it sustainably.

- **Secure finances and resources from** all sectors to help manage forests and create incentives for developing countries to do the same.

- **Help the fight against poaching** by developing work for local communities that allow them to pursue a sustainable

16 PEACE, JUSTICE AND STRONG INSTITUTIONS

- **Significantly reduce the** number of deaths caused by violence globally.
- **Completely eradicate the** exploitation of children in all its forms.
- **Encourage the rule of law** nationally and internationally to establish equal rights for all.
- **Primarily reduce the illegal** flow of weapons and money by organised crime globally.
- **Considerably reduce corruption** and bribery in all their forms.
- **Work towards complete transparency** in institutions at all levels.
- **Make confident decisions at** all levels are made by inclusive and representative groups.
- **Give developing countries** a voice in global decision-making.
- **Provide a form of legal identity,** including birth registration, for everyone globally.
- **Help prevent violence, terrorism** and crime by building on international relationships and cooperation, with particular attention given to developing countries.
- **Develop inclusive laws and** policies that support sustainable development.

17 PARTNERSHIPS FOR THE GOALS

Finance: **Help developing countries** generate income by building infrastructure for public services.
- **Fully secure the funding that** developed countries committed to sharing with developing countries.
- **Generate more funding from additional** sources to help developing countries.
- **Assist developing countries** in balancing their books and helping resolve debt issues.
- **Promote investment** in developing countries.

Technology: **Improve the sharing of innovative** technology on a regional and international level on mutual terms with developing nations.
- **Give developing countries** access to green technology on favourable terms.
- **Help developing countries** with technology and enable them to become self-sufficient with the help of computers, phones and other communication technology.

Capacity building : **Increase international help** to developing countries to implement sustainable development goals.

Trade: **Encourage a fair global trade** system under the World Trade Organisation.
- **Help developing countries** increase their exports.
- **Allow developing countries access to** duty-free and quota-free markets with preferential treatment to help them develop.
- **Systemic issues, policy and institutional** coherence: Improve the stability of smaller economies through developing local policies.
- **Improve clarity on policies** for sustainable development.
- **Approach nations respectfully** to help establish policies to eradicate poverty and promote sustainable development.

Multi-Stakeholder partnerships: **Improve the global collaboration** between countries in all areas to help establish sustainable development worldwide.
- **Help build effective partnerships** between public, private & civil sectors.

Data, monitoring and accountability: **Improve the availability of quality** data from developing countries that can be used nationally.

Improve existing data collection initiatives on sustainable development.
